RESEARCH PARTNERSHIPS PORTFOLIO – PORTEFEUILLE DES PARTENARIATS DE RECHERCHE

October 7, 2025

Applicant: Sam Harper

Application Number: 1017-2025-00465

Dear Sam Harper,

Thank you for submitting your application to the Research on Research Joint Initiative funding opportunity. The Social Sciences and Humanities Research Council (SSHRC), the Canadian Institutes of Health Research (CIHR), and Michael Smith Health Research BC collaborated to develop this funding opportunity as part of ongoing efforts to support metaresearch in the Canadian context. The goal of this joint initiative is to enhance national capacity for metaresearch and bring Canadian expertise and perspectives into the international dialogue on improving research funding practices. Metaresearch is a vital element of social sciences and humanities research, as well as multidisciplinary research, as it allows greater insight into the ways in which research is conducted, evaluated and supported.

SSHRC, CIHR, and Health Research BC appreciate the time and effort you have invested. The merit review committee has completed its assessment, and we are pleased to inform you that the funding partners are able to offer you a grant through this competition.

The relative merit of applications in this competition was assessed based on the established evaluation criteria for this funding opportunity and in accordance with SSHRC's [merit review](#) principles. The membership list of the merit review committee will be posted on the [Merit Review Committees](#) page of SSHRC's website.

As part of this result package, you will find the following documents to provide you with additional information:

- A **Notice of Award** outlining the grant details and reporting requirements; and
- The **Terms and Conditions** of the grant

The funding partners are responsible for demonstrating to Canadians the value and contributions of research in our society. As a recipient of this funding, you have an important role to play in communicating the results of your research within and beyond the academic community. In this regard, we request that you acknowledge the financial support received from SSHRC, CIHR and Health Research BC in all forms of communication, at all stages of your research progress. Additional information on acknowledging SSHRC and CIHR is available on the [Acknowledging SSHRC](#) or [CIHR](#) web pages, and additional information on acknowledging Health Research BC is available in Health Research BC's [media toolkit](#).

-2-

Per the Government of Canada's [Public Communications Policy](#), institutions are asked not to publicly announce their awards until results have been made public through a federal announcement (and, subsequently, [SSHRC's Award Recipients](#) page) or the [government's Grants and Contributions](#) page. This does not preclude individual award holders from sharing information about funding with their colleagues; referring to their funding in applications for other funding; or including acknowledgement of SSHRC funding in journal publications. Nor should the embargo impede award holders from implementing their projects in any way (e.g., engaging stakeholders, hiring students, holding conferences, etc.).

If you have further questions about this funding opportunity, you may send them to partnerships@sshrc-crsh.gc.ca.

We extend our warmest congratulations and wish you every success in your project.

Sincerely,

Éric Bastien
